

Georgios Kontosis

Software Engineer

Profile

Code oriented: building beautiful user interfaces and solid back-end applications
Entrepreneurial: worked as a member of multiple startups and organizations
Team player: from winning the National Tennis Championship in doubles to working on various group coding projects

Coding Experience

FoodShare

Built an Ubuntu Web Server on a virtual machine created at [Okeanos](#)
Coded a web application with Django as back-end and Angular 7 as front-end
Established Pusher API allowing messaging utility between users and Stripe API configuring payment procedures
Deployed the website using nginx web server

Jarvis

Contributed to Jarvis; a simple command line based personal assistant
Conducted code in Python that enables command history iteration to the user

The Fuck

Contributed to The Fuck; an app that corrects errors in previous console commands
Coded in Python adding new rules that catch and correct specific commands

Coordinator @Spotify

Contributed to Coordinator; a visual interface for turning an SVG into XY coordinates, by adding a new feature: converting text to SVG
Coded in JavaScript using Svelte technology and HTML/CSS to configure the user interface

TEDxNKUA

Established an Apache Server and a WordPress theme on a virtual machine at [Okeanos](#)
Maintained the web page's content and enabled competitions' registry and ticket purchasing

Employment History

Air Traffic Controller Assistant @ Greek Army | Athens, Greece

October 2019 — July 2020

Assisted in controlling and directing under intense civil and military air traffic
Analyzed weather metrics to eliminate flight risk per aircraft model
Promoted to team leader responsible for educating fellow soldiers on the tower duties

Business Intelligence Analyst @ Vodafone | Athens, Greece

April 2019 — September 2019

Granted and enriched day-to-day reports based on the business units' requirements
Contributed to redesigning and automating the department's report generation
Innovated by proposing both an entrepreneurial and a data monetization project

Founder & Web Developer @ FoodShare | Athens, Greece

October 2018 — September 2019

Initiated the idea and coded a ready-to-launch platform within 2 months; connecting households, supermarkets and restaurants to share extra food
Participated in [Ennovation 2018](#) of Athens Center of Entrepreneurship and Innovation
Negotiated with Food Bank of Greece, Municipality of Athens and Athens International Airport
